

# Jands@home in Adelaide

The Jands@Home program places senior management and product engineers in a town for a week of meetings with customers and end users alike. The aim is to give the local industry unprecedented access to Jands business and product managers as well as an up to date overview of our range of audio, lighting and staging solutions.

**As a result of this TEC and Jands are holding a special meeting for AES Members and TEC Customers. Jeff MacKenzie (Jands Technical Resource Manager) will be giving a Wireless Spectrum update – what is happening with the spectrum reallocation/white space debate? We will then be putting on a few drinks and nibbles while you get the opportunity to hear about some great new technologies, and get hands on with the product.**

On feature will be:

- The Si3 digital console from Soundcraft
- Clear-Com's new Tempest Communications System
- New Signal distribution product from dbx
- BSS Soundweb with the new AEC (Acoustic Echo Cancellation) capability
- Shure's UHF-R high end wireless system
- Other Jands lighting & staging products

This is a perfect opportunity to see some great stuff not usually on show in Adelaide. We look forward to seeing you there.

**Date: Tuesday 13<sup>th</sup> October**

**Time: 7.30pm – 9.30pm**

**Place: Lyric Room, Adelaide Festival Centre**
