Over the last 8 weeks the V-Mixing System by Roland Systems Group has been received nationwide with genuine enthusiasm and a stream of immediate orders. It offers a digital multicore and 48 channel digital console with immunity to hums and buzzes, lightweight portable construction, a first rate user interface and 2 very affordable recording options.

On April the 17th we will hold a special event to allow you a hands on look at what all the fuss has been about, as well as showing the premiere of a new Edirol vision mixer the V-8, which mixes computer and composite video sources, and offers extraordinary value for money while complementing the V-Mixing system flawlessly.

If you would like to attend, details are as follows:

When: Thursday 17th April 2008 Time: 7:30pm

**Where: Coastlands International Christian Centre,
5 Main South Road (Corner Chandlers Hill Rd), O'HALLORAN HILL**

RSVP: Keith on 0411 556 075 or email: keith@tecsa.com.au
